TO: Minerals File

FROM: Doug Jensen, Senior Reclamation Engineer 

SUBJECT: Site Inspection, Sunroc Corporation, East Veyo Cinder Knoll,
S/053/067, Washington County, Utah

Date of Inspection: March 22, 2004
Time of Inspection: 3:00 p.m.
Conditions: Hot
Participants: Doug Jensen, DOGM

Purpose of Inspection:

Inspected the site while in the area.

Getting to the site:

See previous inspection memos.

Observations:

The pit at the site is deeper than at my last visit on February 3, 2003, but the footprint on the site has not increased. The site is fenced, gated and clean; pictures of the site were taken and are included with this memo. There were no building or equipment at the site at the time of the visit. I did not view any areas of concern at the site.

Conclusions and Recommendations:

There are no recommendations for the site, I will continue to monitor when I am in the area.
